

Northwind Renewables plc

Annual Operations Report - Financial Year 2024

Generation performance

Total electricity generation for FY2024 was 1,240 GWh, an increase of 8.3 per cent over FY2023. Excluding the Blackridge site, which was divested in October 2024, total generation for FY2024 was 980 GWh.

Fleet

The operating fleet comprised 84 turbines as of December 31, 2024, across six wind farms in the northern region.

Leadership

Dr. Elena Voss serves as Chief Operating Officer of the Company and has held that office since June 2019.

Curtailment losses amounted to 42 GWh during FY2024.
